### Rationale

#### Material event

In April 2022, HDFC Limited (HDFC; rated [ICRA]AAA (Stable)/[ICRA]A1+) had announced a scheme of amalgamation, whereby it would amalgamate with and into HDFC Bank Limited (HDFC Bank; rated [ICRA]AAA (Stable)), subject to regulatory approvals. Upon the implementation of the proposed transaction, HDFC's subsidiaries/associates (including HDFC Credila Financial Services Limited (Credila)) would become subsidiaries/associates of HDFC Bank, subject to regulatory and other approvals.

On April 20, 2023, HDFC Bank received some clarifications in this regard from the Reserve Bank of India (RBI), wherein the RBI has permitted the bank to continue holding HDFC's stake in Credila, subject to the shareholding being brought down to 10% (from the existing 100%) within two years from the effective date of amalgamation and not onboarding new customers.

#### Impact of the material event

ICRA's ratings for Credila derived support from its being a wholly-owned subsidiary of HDFC. Given the clarification from the RBI, HDFC could evaluate the divestment of its stake in Credila, which would result in a change in ownership of Credila. HDFC could also evaluate merging Credila's assets and liabilities with HDFC Bank, post the effective date of HDFC's amalgamation with the bank.

The long-term ratings have been placed on Watch with Developing Implications considering the uncertainty regarding the investors and the approach which would be followed to adhere to the RBI's directive. With restrictions on the onboarding of new customers, the business growth is expected to be impacted and further clarity is awaited on the same. Given the likely change in shareholding, the impact on funding and liquidity will be a key monitorable though ICRA expects funding support to be forthcoming from the parent in the interim.

ICRA will continue to monitor the developments closely and will take appropriate rating action once there is more clarity on the above.

### Key features of rated debt instrument

The perpetual debt programme is rated one notch lower compared to the other long-term debt programmes to reflect the specific features of these instruments wherein debt servicing is additionally linked to meeting the regulatory norms on capitalisation and reported profitability. The domestic regulatory norms include regulatory approvals from the RBI for debt servicing (including principal repayments) if the company reports a loss and is not liable to service the debt if it breaches the minimum regulatory capitalisation norms.
