Research Update:

Union Bank of India Outlook Revised To Positive On Proposed Capital Raising; Ratings Affirmed

June 20, 2024

Overview

- Union Bank of India has announced a plan to raise capital of up to Indian rupee (INR) 100 billion, of which up to INR60 billion is likely to be in form of common equity.
- The strengthened capitalization would bolster the India-based bank's financial resilience and support growth.
- We revised our outlook on the long-term issuer credit rating on Union Bank to positive from stable. We affirmed our 'BBB-/A-3' ratings on the bank.
- The positive outlook reflects our view that we could upgrade Union Bank over the next 12-24 months if we raise the sovereign rating on India and the bank's RAC ratio improves to stay above 7%.

Rating Action

On June 20, 2024, S&P Global Ratings revised its rating outlook on Union Bank of India to positive from stable. At the same time, we affirmed our 'BBB-' long-term and 'A-3' short-term issuer credit ratings on the public sector bank.

Rationale

The outlook revision reflects our view of a one-in-three possibility of an upgrade of the bank over the next 12-24 months. This could happen if Union Bank's risk-adjusted capital (RAC) ratio improves to sustainably above 7% and we raise the sovereign credit rating on India (BBB-/Positive/A-3).

In our view, Union Bank's announcement on June 12, 2024, that it will raise INR60 billion common equity, together with lower risk weights in the event of an upgrade of India, could keep the bank's RAC ratio at about 7%, our threshold for an adequate assessment for capital and earnings. The fund raising is in addition to the bank's INR80 billion qualified institutional placement in fiscal 2024 (ended March 31, 2024).

In our view, Union Bank's latest fundraising also provides growth capital for the bank. We expect loan growth of 12%-13% for Union Bank over the next two fiscal years, primarily driven by retail, agriculture, and micro, small and midsize enterprises. The bank's likely growth is in line with our expectation for the banking sector in India.

Outlook

The positive outlook on Union Bank reflects the bank's improving capitalization and the outlook on India. We expect the likelihood of government support for the bank to remain very high over the next 24 months.

We believe Union Bank's financial profile will continue to improve, aided by better operating conditions, and the bank's stabilizing earnings and improving asset quality. In our view, the public sector bank will maintain its solid funding and liquidity profile over the next two years supported by high customer confidence in the Indian banking system.

Downside scenario

We could revise the outlook on Union Bank to stable if we take a similar action on the sovereign rating, or if the bank's RAC ratio is unlikely to improve above 7% on a sustainable basis, limiting the upside to the stand-alone credit profile.

Upside scenario

We could upgrade Union Bank if we raise the sovereign credit rating on India and the bank's RAC ratio sustainably improves to more than 7%.
